SUMMARY

Senior full-stack engineer with 15+ years delivering web and mobile products, specialising in TypeScript, React, Next.js and frontend architecture. Led frontend delivery at Quilter from proof of concept to production within nine months. Solo technical co-founder of Paper Trails (papertrails.io), a geospatial print and commerce platform supporting thousands of customer orders worldwide. Creator of Mapbox TUI and a contributor to Strata.

OPEN SOURCE

Mapbox TUI - Creator | Go

github.com/adamcbrewer/mapbox-tui

- **Agent remote control:** CLI/MCP control of a running map: camera, journeys, imports, playback and saved workspaces.
- **Journey planning:** Mapbox walking, cycling and driving routes, editable waypoints and shareable commands to reopen plans.
- **Activity exploration:** Offline GPX, FIT, TCX and KML inspection, timed playback and elevation-profile comparisons across multiple files.

Strata - Contributor | Rust, GTK4

github.com/lgse/strata

- **Mesh previews:** Added four on-demand camera views, triangle-count badges and cached renders for STL and single-part 3MF models. (github.com/lgse/strata/pull/1644)
- **Sandboxed previews:** Added 3D-model rendering and ebook covers with bounded parsing and regression tests. (github.com/lgse/strata/pull/1276, github.com/lgse/strata/pull/1325)
- **Navigation and state:** Shipped keyboard tab controls and fixed multi-window bookmark cleanup. (github.com/lgse/strata/pull/1506, github.com/lgse/strata/pull/1373)

SKILLS

Languages & APIs:	GraphQL, Rust, Go, Node.js, Next.js Server Actions, PHP/Laravel, REST APIs
Cloud & Delivery:	AWS (Lambda, API Gateway, RDS, Amplify), Azure, DigitalOcean, Docker, CI/CD, GitHub Actions, pnpm, Nx
Frontend:	TypeScript, JavaScript, React, Next.js, React Native, Ionic React, Capacitor, HTML, CSS
Architecture & Data:	Frontend Architecture, Design Systems, Component Libraries, MongoDB, Mongoose, PostgreSQL, Prisma
Quality:	WCAG 2.2 AA, Jest, Testing Library, Playwright, Storybook, TDD
Additional:	AI-assisted Engineering, Agent Workflows, Polygon, Alchemy

WORK EXPERIENCE

Quilter

Jan 2024 - Jul 2026

Senior Full Stack Developer

- Provided frontend technical leadership for a portfolio-planning platform serving financial advisers, taking it from proof of concept to production within nine months and supporting multiple subsequent releases.
- Created the shared component architecture used by Next.js web and Ionic React/Capacitor mobile clients, reducing duplication through shared TypeScript packages and meeting WCAG 2.2 AA requirements.
- Standardised server and complex form state with TanStack Query, Next.js server actions, Yup and Zustand, creating consistent reusable patterns across applications.
- Improved Jest coverage reporting and Playwright E2E protection, and led the npm-to-pnpm migration to strengthen dependency controls and CI reliability.

React, Next.js, TypeScript, Ionic React, Capacitor, TanStack Query, Zustand, Jest, Playwright, pnpm, Azure DevOps

Paper Trails Mar 2019 - Present

Technical Director & Co-Founder

- Solo technical co-founder of a production SaaS that has fulfilled thousands of personalised print orders worldwide.
- Migrated the application from a Laravel REST backend and legacy frontend to Next.js App Router, TypeScript, server actions and MongoDB/Mongoose.
- Built a geospatial pipeline spanning Strava/GPX/FIT ingestion, Mapbox composition, Playwright print rendering, Sharp thumbnails, DigitalOcean Spaces and Prodigi fulfilment.
- Own Stripe commerce, Mailgun communications, Jest/Testing Library/Playwright testing, GitHub Actions CI, DigitalOcean deployment, monitoring and production support.

React, Next.js, TypeScript, MongoDB, Mongoose, Mapbox, Stripe, Jest, Testing Library, Playwright, GitHub Actions, DigitalOcean

Meshii WiFi Feb 2023 - Oct 2023

Software Architect

- Led architecture and technical delivery for a React Native/Expo application rewarding decentralised WiFi participation with Polygon-based tokens.
- Integrated Alchemy and Polygon transaction flows with an AWS serverless backend, including signed webhooks and transaction-status reconciliation.
- Led three developers from architecture through a private pilot using AWS Lambda, API Gateway, Amplify Hosting and PostgreSQL/Prisma on RDS.

React Native, Expo, TypeScript, AWS Lambda, API Gateway, PostgreSQL, Prisma, Jest, Polygon, Alchemy

Independent Consultant, Brewer Logic Sep 2019 - Nov 2022

Senior Full Stack Developer

- Novata (Mar-Nov 2022): Delivered React/TypeScript carbon-emissions features, PostgreSQL and Prisma API work, reusable components and Jest tests meeting WCAG 2.1 AA requirements.
- Etch/Quilter (Sep-Dec 2020; Apr 2021-Jan 2022): Built retirement-choice and adviser investment-profiling products using React and TypeScript, including Storybook components, API-driven journeys, SVG financial charts and PDF reports.
- The Economist (Feb-Jun 2020): Extended its tested React design system and built the Gatsby/MDX public style-guide platform, including accessible component patterns and visual-regression testing.
- Apple (Sep-Oct 2019): Modernised and supported a business-critical internal web application; further details are confidential.

React, TypeScript, Storybook, Gatsby, PostgreSQL, Prisma, Jest, WCAG 2.1 AA

Applied Works Aug 2017 - Jun 2018

Senior Web Developer

- Provided frontend leadership and mentored developers within an international 15-20-person team.
- Architected Redux state patterns for a large React and TypeScript application.
- Built Storybook UI components supporting a consistent, reusable interface.

React, TypeScript, Redux, Storybook, Node.js, Team Leadership

Selected Earlier Experience 2010 - 2017

Frontend and Web Developer roles

- iRiS/Marriott: Built a multilingual React/Redux mobile-dining application embedded in Marriott's native app, covering menus, cart customisation and guest-order API flows.
- Toaster: Built Google Play Policy guidance with Polymer/Web Components and an interactive, touch-enabled Google Search Indonesia campaign.
- Burberry: Developed Burberry.com e-commerce and touch-enabled HTML Canvas prototypes for interactive product experiences.

JavaScript, HTML, CSS/Sass, PHP, Polymer, Web Components

British Army (REME) Feb 2005 - Nov 2009

Aircraft Technician, Corporal

- Reached Corporal, supervising small teams maintaining military helicopters in the UK, Germany and Iraq.

EDUCATION & CERTIFICATIONS

Aeronautical Engineering Apprenticeship 2005 - 2006

REME School of Aeronautical Engineering
